## Deniri BC010 Smart Battery Charger

[Purchase a Deniri BC010](#)

### Product Overview

The Deniri BC010 battery charger is a full 8amp charger and battery maintainer. It was also bring back to life batteries that deemed dead and not chargeable with it's repair option.

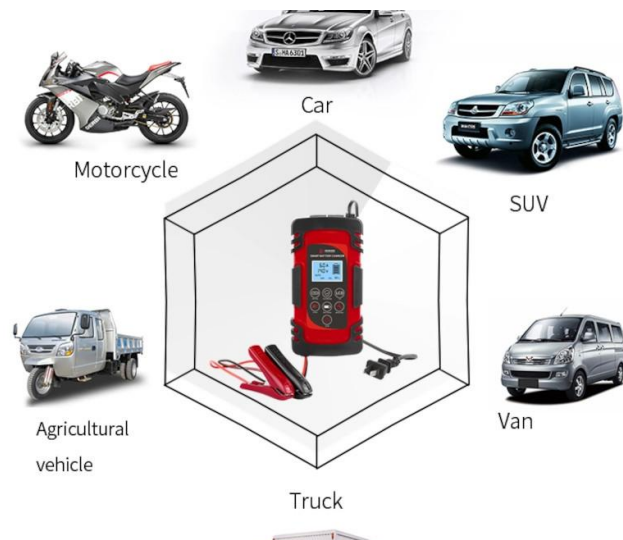

The charger is designed for 12 and 24 volt batteries. Battery types: all types of lead-acid batteries, including flooded, gel and AGM, as well as marine and deep-cycle batteries. [It is not intended for Lithium batteries.](#)

The charger can be used for cars, trucks, RV'S, motorcycles, ATV'S, electrical generators,

Can be used to bring a battery back up to full charge or be used to maintain the charge over an extended period of time without the fear of overcharge or .

This is a maintainer not a battery trickle charger. Many trickle charger will burn out batteries over a long period of time as they constantly charge the

battery. Our battery maintainer will stop charging when the battery is fully charged, monitor the battery and charge at a low amperage when the battery voltage dips.

### Operation

First attach the red lead to the positive post on your battery. Attach the black lead to the negative post or a ground on your vehicle (something metal such as the engine or chassis). Then connect the charger to a 110volt ac outlet.

The charger will start flashing. Press the On/Off button to activate the charger. Now the charger will analyze the type of battery and automatically set the charging voltage and amperage. The charger will automatically lower the amperage as the battery level rises.

When the battery is fully charged the unit will go into a maintenance mode. It will not overcharge or burn out the battery.

If the charger does not recognize your battery when you press the On/Off switch, the battery level may be too low for the normal charging mode. Press the button with the red wrench (this is the repair battery mode).

**Specifications:**

Charge rate for 12 volt batteries, 4amp, 6amp and 8amp, for 24 volt, 4amp. As well as a Constant Pulse Current Maintenance function for a fully charged battery. This function will not overcharge or discharge your battery. Smart fan for temperature control. Thick pure copper cables for conductivity, long service and safety.

**Reviews and comments:**

We have received positive reviews with people praising the fact that they brought dead batteries back to life. People are happy with our price as it is reasonable for a full 8 amp charger/maintainer.

We only have had one person who complained but it was because they didn't follow the directions. They returned the item and we found it to be operating correctly.

If you do have any questions or concerns about the charger, be sure to contact us. We sell these chargers primarily through Amazon who has a 90 return policy. We find their prompt shipping and customer service to be exceptional.
